

ADHERENCE COMPUTATION

Adherence measurement will use mainly three methods:

1. Appointment keeping/Pharmacy refills
2. Self reporting by client
3. Pill Count.

To compute

1. Appointment keeping

| No of Days Missed | % | Adherence |
|-------------------|--------|-----------|
| 0 | 100% | Excellent |
| Within 2 days | ≥95% | Good |
| >3-<14days | 84-94% | fair |
| >14 and above | <85% | Poor |

2. Self reporting on missed doses

| Adherence | % | 1×daily dosing | 2×daily dosing |
|-----------|--------|----------------|----------------|
| Excellent | 100% | 0 doses | 0 doses |
| Good | ≥95% | < 2doses | ≤3 doses |
| Fair | 84-94% | 2-4doses | 4-8doses |
| poor | <85% | ≥ 5 doses | ≥9doses |

3. Pill Count

| Adherence | % | 1×daily dosing | 2×daily dosing |
|-----------|--------|----------------|----------------|
| Excellent | 100% | 0 pills | 0 pills |
| Good | ≥95% | < 2 pills | ≤3 pills |
| Fair | 84-94% | 2-4 pills | 4-8 pills |
| poor | <85% | ≥ 5 pills | ≥9 pills |
